# MONITORING AND DETECTION OF ECOSYSTEMS CHANGES FOR ENHANCING RESILIENCE AND ADAPTATION IN THE PHILIPPINES (MODECERA)

- **MODECERA**, as it is popularly known, is a program led by the University of the Philippines Los Baños (UPLB) and is funded by the Department of Science and Technology (DOST) and Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (PCAARRD).
- Its main objective is to set up a long-term ecosystems changes monitoring system in eight (8) selected watersheds including the CALSANAG WFR in Tablas, Romblon spearheaded by Romblon State University.

**Project 1:** Onsite Environmental Monitoring

**Project 2:** Monitoring the Responses and Productivity of Annual Field Crops; and Development of Intervention Strategies to Enhance Crop Adaptation to Climate Change

**Project 3** Monitoring the Responses and Productivity of Industrial and Fruit Crops; and Development of Intervention Strategies to Enhance Crop Adaptation to Climate Change

**Project 4:** Effects of Climate Change on Integrated Pest Management

## Research and Development

# MONITORING AND DETECTION OF ECOSYSTEMS CHANGES FOR ENHANCING RESILIENCE AND ADAPTATION IN THE PHILIPPINES (MODECERA)

## HIGHLIGHTS

- **Tablas Drongo (*Dicrurus menagei*)**, an endemic species to Tablas Island in Romblon, is considered endangered due to its very small population (del Hoyo et al., 2009). Last sighted in 1998, this species is believed to be already extinct until it was spotted by a foreign scientist named Desmond Allen during one of his visits on the island between 1998 and 2002 (Allen, 2006).
- Nearly a decade later, Tablas Drongo is documented for the first time by the MODECERA team in Romblon State University. During fauna assessments conducted in the CALSANAG Watershed Forest Reserve, the team sighted the *Dicrurus menagei* in Brgy. Balogo in Calatrava, Brgy. Mari-Norte in San Andres, and Brgy. Dubduban in San Agustin.

# ASSESSMENT AND MAPPING OF CORAL REEFS FOR POTENTIAL ECOTOURISM AND LIVELIHOOD OPPORTUNITIES

- Despite the rich marine resources of the province, the coral reef in entire Romblon is not fully assessed as well as their potential as the source of livelihood as a tourism site. In addition, detailed map of coral reef distribution in the province is not yet established. Hence, this project was realized funded by the DENR-Romblon.

**Research and Development**

# ASSESSMENT AND MAPPING OF CORAL REEFS FOR POTENTIAL ECOTOURISM AND LIVELIHOOD OPPORTUNITIES

## HIGHLIGHTS

- Excellent coral covers in the Municipality of Sta. Fe

**Research and Development**

## COLLECTION AND CHARACTERIZATION OF UPLAND RICE VARIETIES IN THE PROVINCE OF ROMBLON

- This research is funded by Department of Agriculture MIMAROPA in partnership with Philippine Rice Research Institute.
- The output of this research is the database of the different upland rice varieties collected in the province and the specific characteristics of each collected upland rice varieties that can be used for future varietal improvement and other upland rice related researches.

**Research and Development**

# COLLECTION AND CHARACTERIZATION OF UPLAND RICE VARIETIES IN THE PROVINCE OF ROMBLON

## HIGHLIGHTS

- A total of 32 accessions of upland rice available in different municipalities in Romblon

## IDENTIFYING SUITABLE SITES FOR SMALL SCALE IRRIGATION PROJECTS (SSIPs) IN THE PROVINCE OF ROMBLON AND MARINDUQUE THROUGH GIS-BASED WATER RESOURCES ASSESSMENT

- This project is implemented by Romblon State University and Marinduque State College funded by DA-Bureau of Agricultural Research.
- This is to identify suitable sites for small scale irrigation projects in support to agricultural production.
